

UTILITY BRACKET

ABSTRACT OF THE DISCLOSURE

A utility bracket for attaching wires or wire bundles to a structure is provided. The utility bracket includes a first portion that supports a product and a second portion for adhering to a support structure. The second portion includes a separation component that separates the second portion from the support structure by a predefined amount. The separation component includes a plurality of ridges or dimples for allowing even application of an adhesive. A nut plate or wire ties secure the product to the first portion. The second portion can include a base plate that is rotatably coupled to the first portion. The bracket can be formed by a molding or extruding process.
